SKILLS

Cloud Computing

Networking

Hosting

API Developing

Software Engineering

CERTIFICATION

Getting Started with Linux Terminal

Automation Scripts Using Bash

Command Line in Linux

Shell Scripting with Bash: Basics

JavaScript for Beginners

University of California, Davis -

Specialization Certificate

[Coursera] - 4 Certifications

Programming Foundations with
JavaScript, HTML and CSS

Docker for absolute beginners

Digital Transformation with
Google Cloud

PROFILE

I am a cybersecurity student with a comprehensive understanding of software development and design. I am also experienced in developing and integrating APIs, as well as coordinating with stakeholders.

EDUCATION

BE - CSE (CYBERSECURITY)

Sep 2022 - Present

Saveetha Engineering College

- CGPA: 8.1
- In-depth coursework on network security, cryptography, and ethical hacking, providing a strong foundation in protecting and securing digital information.

PROJECTS

Own GPT using Gemini API

- Developed a custom GPT model utilizing the Gemini API, enhancing natural language processing capabilities for various applications.
- Enabled with Google Identity Login

Streaming Site using StreamTape API

- Created a streaming site using the StreamTape API, enabling efficient video upload, management, and playback functionalities.
- offering a seamless and user-friendly video streaming experience.

CERTIFICATION

- 📖 [Databases and SQL for Data Science with Python](#)
- 📖 [Programming Foundations with JavaScript, HTML and CSS](#)
- 📖 [Interactivity with JavaScript and jQuery](#)

EVENTS

-  Life Encoders - Drestein`23
[Saveetha Engineering College](#)
-  Metchiramer - SSE
[Saveetha School of Engineering](#)
-  Non Technical
[Saveetha Engineering College](#)

LANGUAGES

Tamil

English

Hindi

EXPERTISE

- Cybersecurity
- Networking
- API Development
- Software Designing
- Web Development
- Web Hosting
- Virtualization
- Docker Depoly

DECLARATION

I hereby declare that all the information provided above is true and correct to the best of my knowledge and belief.

SINCERELY,

MOHANISH K

PROJECTS

Music Site Using Saavn API

- Built a music streaming site using the Saavn API, allowing users to search, play, and manage their favorite music tracks.
- Enabled with In-App Login, OTP Auth

Whatsapp BoT

forked from Chreems bot

- Customized and enhanced the Chreems bot to create a functional WhatsApp bot capable of automating responses and performing various tasks.
- Integrated the bot to improve user interaction and efficiency in managing communications on the WhatsApp platform.

Python Telegram BoT

forked from pyro bot

- Developed a Python-based Telegram bot by forking from the Pyro bot, adding features for automated messaging and user interaction.
- Deployed the bot to streamline communication and provide automated services on the Telegram platform.
- Auto Reaction Function is Added

Third Party Website Development for Company

As a Beginner Developer

- Designed and developed the back-end and front-end of a third-party website for a company, ensuring seamless integration and functionality.
- Implemented user-friendly interfaces and robust server-side logic to enhance the overall user experience and operational efficiency.

CONFERENCE PAPER

Published

- Authored a conference paper focusing on innovative approaches to DDoS prevention using artificial intelligence techniques within the field of cybersecurity.
- Presented research findings and methodologies at a cybersecurity conference, contributing to the academic and professional discourse on AI-driven security solutions.
